

Overall Feedback

1) d wrong -2.5

4) incorrect node generation -3

incomplete tree structure(child nodes of the root node) -5

5) missing child node -2

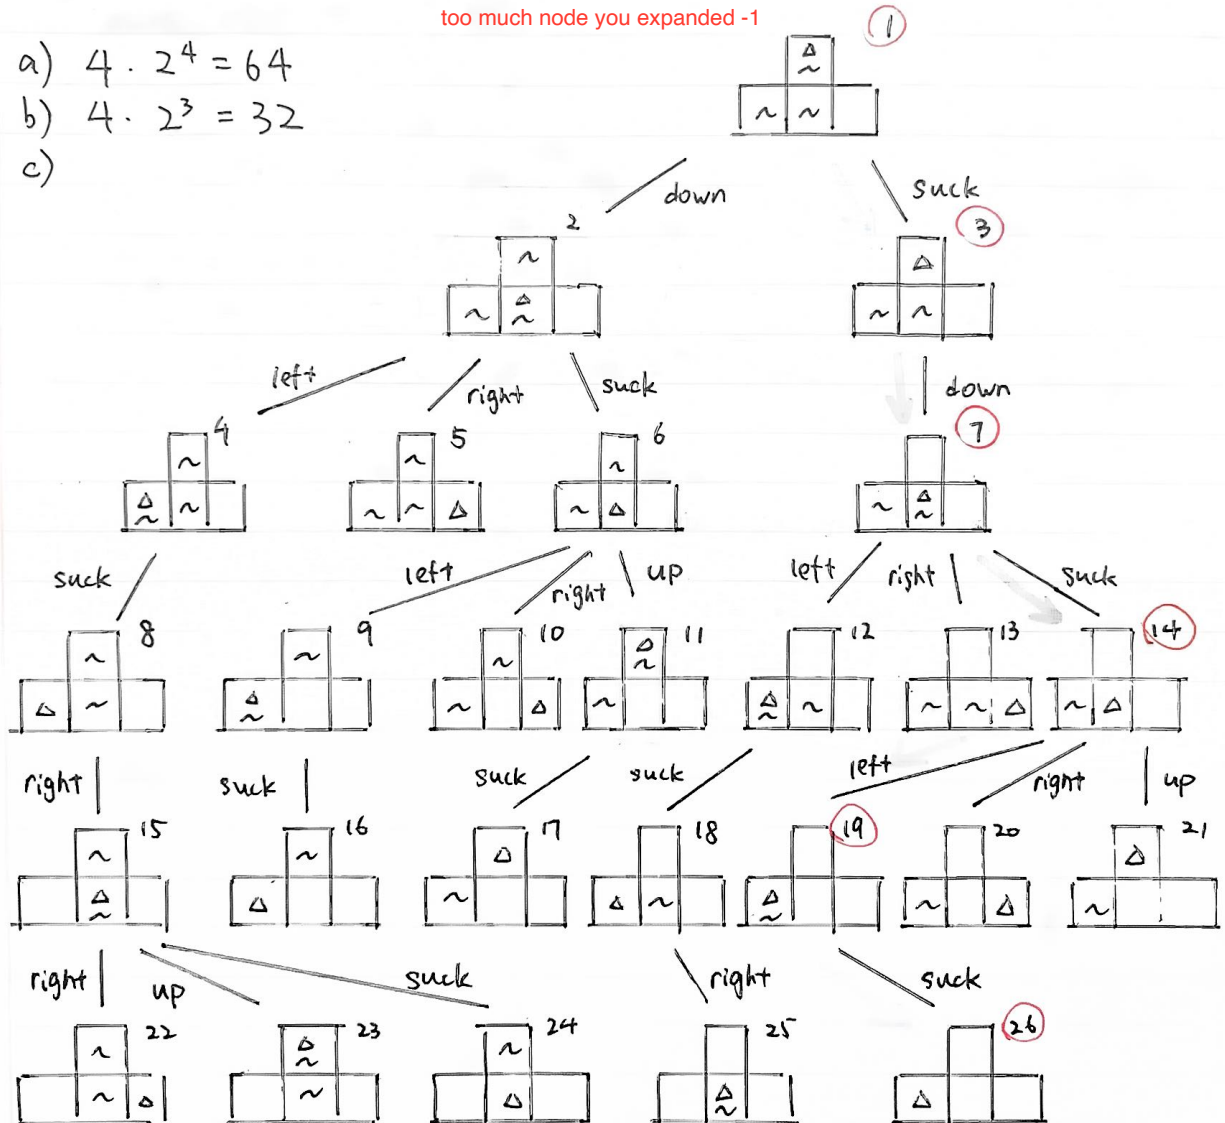

wrong node expansion order -2

missing highlight of solution path -2

too much node you expanded -1

1. a) False
b) False
c) True
d) True

2. a) $4 \cdot 2^4 = 64$
b) $4 \cdot 2^3 = 32$
c)

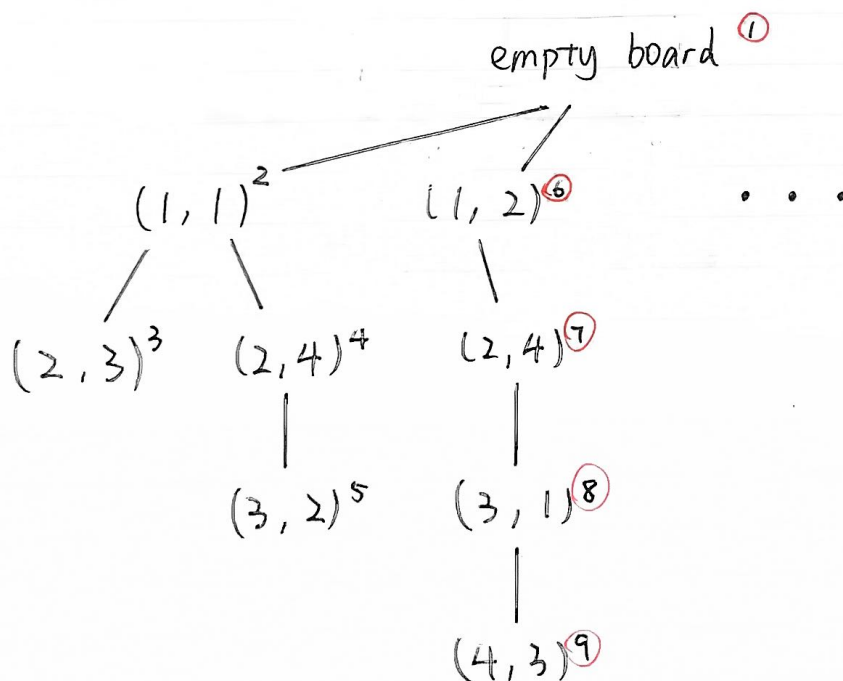

- d) Yes. Graph search prevents depth-first search from repeatedly reaching the same state and entering a loop. The search space of this problem is finite so depth-first search can be used.

3. a) move blank # 1 { left
right
up
down
- move blank # 2 { left
right
up
down

b) $\frac{16!}{2} = 10461394944000$

4. (a, b): add queen at ath row bth column

5. cost City order
